Labour market data in the US showed some softening as non-farm payrolls rose by 209K (est.: 230k) in Jun'23. This is the weakest pace since Dec'20. However, wage growth remained sticky (average hourly earnings rose at the same pace of 0.4%, MoM basis). Thus, signalling that Fed fund rates are likely to remain elevated for some time. Elsewhere, in Germany, industrial production fell by 0.2% in May'23 from 0.3% increase in Apr'23. In China, PPI deflation (-5.4% in Jun'23 from -4.6% in May'23, YoY) deepened to its lowest in 7 years and CPI drooped to its 28-month low (0% from 0.2%). Both core PPI and CPI noticed a drop, reflecting weaker demand conditions. Thus, more stimulus on PBOC's front may be forthcoming. On domestic front, progress of monsoon has picked pace with cumulative rainfall at 2% above LPA (long period average) as of 9 July against a deficit of 8% last week.

- Global markets ended in red as investors tracked the key US jobs report. While the pace of job additions softened, wage growth remained robust. Investors now await corporate earnings results and US inflation report to assess the future path of rates. Nikkei declined the most by 1.2%, followed by Hang Seng which shed 0.9%. Sensex too dipped by 0.8%, amidst a fall in power and real estate stocks. However, it is trading higher today, in line with other Asian stocks.

- Global yields closed mixed. While UK 10Y yield closed a tad lower by 1bps despite BoE Governor's reiteration of that fact that abiding to the 2% inflation target is important for policy credibility. US 10Y yield rose by 3bps as wages remained sticky. China's 10Y yield closed stable eyeing inflation data. India's 10Y yield closed a tad higher by 1bps. It is trading at the same level today.
