After a turbulent week, a degree of calm returned to the global markets as investors await commentary from major central banks at the Jackson Hole Symposium. With growth indicators in US suggesting a resilient economy, expectations of “higher for longer” rates by Fed have increased. Stress returned in China’s battered property sector, despite stimulus measures by government and PBOC. Most recently, PBOC cut the 1Y loan prime rate (LPR) by 10bps to 3.45%. Retail sales volume in UK fell by 1.2% in Jul’23 (est. -0.6%), indicating a drag on consumer spending amidst elevated inflation. In India, monsoon rains have turned elusive with a deficit of 7% below LPA (upto 20 Aug). While overall kharif sowing is 0.1% higher than last year, sowing of pulses and oilseeds is lower and remains a cause of concern.

- Except US (higher), global indices ended lower amidst expectations of tighter financial conditions. Recent estimates by Bloomberg suggest that US is likely to have a soft landing, with higher likelihood of dodging a recession. This pushed US stocks higher. Asian stocks continued to falter amidst woes in China’s real estate sector. Sensex fell by 0.3% dragged by technology and metal stocks. However, it is trading higher today while other Asian stocks are trading mixed.

- Global currencies ended mixed. After rising to a near 2-month high, DXY pulled back and ended 0.2% lower. For the week, it is still up by 0.5% amidst bets of higher for longer US rates. GBP fell as UK’s retail sales disappointed. INR appreciated by 0.1%, from a record low. It is trading stronger today, while other Asian currencies are mostly weaker.

- Global yields closed lower as some respite was seen from the recent rout. Germany's 10Y yield fell the most by 9bps as ECB official (Philip R. Lane) spoke of not driving demand 'deeply negative'. UK's 10Y yield fell by 7bps as core retail sales data showed considerable degree of softening. India's 10Y yield fell by 3bps in line with global cues. It is trading at 7.23% today.
