In Q1CY23, US GDP growth slowed to 1.1% (est. 2%) from 2.6% in Q4CY22. Inflationary pressures remained with core PCE index rising by 4.9% in Q1CY23 (est. 4.7%) versus 4.4% in Q4. Further, labour market remained tight, with jobless claims falling by 16,000. This suggests that economy may be entering a phase of stagflation. Even so, the Fed looks set to deliver another rate hike next week. Elsewhere, BoJ maintained its ultra-dovish stance, while revising growth projections lower and inflation projections upwards. This comes on the heels of data showing a higher than expected increase in CPI in Tokyo. Core-core CPI rose at the fastest pace in 40-years.

- Except FTSE (lower), global stocks ended higher. Investor sentiments were buoyed by strong corporate earnings. Apart from this, robust increase in personal consumption demand in Q1 and better than expected core PCE data in the US, also lifted sentiments. S&P 500 and Dow rose the most. Sensex rose by 0.6%, led by real estate and technology stocks. It is trading lower today, while other Asian stocks are trading higher.

- Except GBP and CNY, other global currencies fell against the dollar. DXY gained as US core PCE index rose more than expected, bolstering views of higher rates. INR too depreciated by 0.1% as oil prices moved up. However it is trading stronger today, in line with other Asian currencies.

- Global yields closed mixed. US 10Y yield rose the most by 7bps as pending home sales data, personal consumption demand in Q1 and core PCE posted

solid growth. Even Germany and UK's 10Y yield rose by 6bps each as markets are pricing in a 25bps rate hike from Fed. Japan's 10Y yield closed on anticipation of the tone of future policy guidance from new BoJ Governor. India's 10Y yield also fell by 2bps ahead of weekly auction. It is trading at 7.12% today.
