Inflation in US as measured by Fed's preferred gauge, PCE price index softened to 3% in Jun'23 (3.8% in May'23), its slowest pace in ~2 years. Core PCE index (ex. food and energy) rose by 4.1% in Jun'23 versus 4.6% in May'23. The data has raised the possibility that the Fed's rate hike cycle may have reached its end. In Europe, while GDP growth in Germany stagnated in Q2CY23, growth in France and Spain showed resilience. Industrial output in Japan rebounded to 2% in Jun'23 versus -2.2% in May'23 (MoM). China's official manufacturing PMI edged up to 49.3 in Jul23 from 49 in Jun'23, but remained in contraction. Non-manufacturing PMI dipped to 51.5 from 53.2, led by a steep fall in construction activities. In India, the South-West monsoon has progressed well and is now 6% above LPA. Kharif sowing was lower by 0.3% compared with last year, led by pulses and jute and mesta.

- Except Japan and India (lower), global indices ended higher. Investors remained optimistic on hopes of soft landing. Minneapolis Fed President also showed confidence on inflation outlook. Even University of Michigan's long term inflation expectation data remained well anchored. Nikkei on the other hand dropped following BoJ's unscheduled bond buying operation. Sensex fell by 0.2%. However, it is trading higher today, in line with other Asian stocks.
