Central Bank of Canada surprised the markets by hiking its key policy rate by 25bps to 4.75%, thus taking it to 22-year high. The bank had been on hold since Jan'23, however, in view of stubbornly elevated inflation, it decided to hike again. RBA had also made a similar move. Investors are now jittery that even other major central banks may also follow the suit and a pause may not imply end of the rate hike cycle. Markets are now factoring in a probable rate hike by Fed in Jul'23, following a pause in Jun'23. Elsewhere in Asia, Japan's Q1CY23 GDP was revised sharply up to 2.7% (est.: 1.9% and 1.6% as per first estimates), led by upward revision in private non-residential investment, private demand and domestic demand.

- Apart from S&P, Nikkei (lower), and FTSE (flat), other global indices closed higher. S&P fell as mega-cap stocks (Microsoft, Google) underperformed. FTSE ended flat owing to fears around inflation and central bank action. Sensex rose by 0.6%, led by cap goods, metals and realty stocks. It is trading further higher today, while other Asian stocks are trading lower.

- Except JPY and CNY (lower), other global currencies ended higher against the dollar. DXY ended flat as investors await US CPI print for May'23 and Fed's rate decision. JPY is trading higher today after Japan's Q1 GDP was revised sharply upwards. INR rose by 0.1%. However, it is trading a tad lower today, in line with other Asian currencies.

- Sovereign yields in developed markets jumped sharply, with US (+14bps) and Germany (+8bps) leading the way. After RBA, Bank of Canada also surprised

markets with a rate hike, leading to concerns that other major central banks may also do the same. India's 10Y ended flat awaiting RBI's decision. However, following global cues, it is trading a tad higher at 7% today.
