Macro developments

- Recovery in India's industrial output hit a snag in Nov'20 as it fell by 1.9% following a 4.2% increase in Oct'20. CPI inflation too eased significantly to 4.6% in Dec'20 from 6.9% in Nov'20. This was driven by (-) 10% vegetable inflation. While the dip in CPI inflation is positive, some of it may not sustain with reversal in vegetable prices. Thus RBI will remain on hold.
- China's credit growth fell by 22.7% in Dec'20 on YoY basis versus 10% increase in Nov'20. Total aggregate financing eased to 1.72tn Yuan from 2.13tn Yuan in Nov'20. Bank lending eased significantly to 1tn Yuan from 1.5tn Yuan. Stock of outstanding credit growth eased to 13.3% in Dec'20, while M2 growth dropped to 10.1% from 10.7% in Nov'20. This can be explained by seasonal factors and gradual rollback of stimulus by PBOC.
- Unemployment rate in South Korea edged up to a 10-year high at 4.6% in Dec'20 versus 4.1% in Nov'20. The number of employed person also fell at its sharpest pace in about 22-years to 26.5mn in Dec'20, a decline of 628,000 from Dec'19. Job losses were most pronounced in restaurants and hotels sector (313,000) amidst a resurgence in Covid-19 cases.
