### Macro developments

- IMF expects India's GDP to contract by 10.3% compared with a 4.5% dip estimated earlier. The downward revision is mainly due to sharper than anticipated contraction in growth in Q1FY21 at 23.9%. Growth is expected to rebound to 8.8% in FY22, making India the fastest growing economy. Global growth is now expected to contract by 4.4% in CY20, an upward revision of 80bps, as growth in advanced economies is expected to contract at a slower pace than earlier estimated (-5.8% versus -8.1% earlier).
- US CPI moderated to 0.2% in Sep'20 from 0.4% in Aug'20 (MoM) driven by easing of supply chain disruptions. Core inflation, excluding food and energy too rose by 0.25 in Sep'20. However, the prices of used car and trucks continued to edge upwards (6.7% in Sep'20 from 5.4%). On a YoY basis, CPI increased by 1.4% in Sep'20 from 1.3% in Aug'20.
- Germany's ZEW economic sentiment index fell sharply to 56.1 points in Oct'20 (est.: 73) from 77.4 in Sep'20. Resurgence in COVID-19 cases, uncertainty around Brexit and US presidential elections, were the key drivers of this trend. Thus the financial market sentiment index also tumbled to 52.3 in Oct'20 from 73.9 in Sep'20.
