Macro developments

- In the last tranche of the fiscal package, the FM announced a 2% rise in state borrowings. Centre's gross borrowing is at Rs 12tn. This will likely offset revenue loss from lockdown. The Rs 21tn stimulus announced by FM focusing on MSMEs, agri, coal infra and power sector will provide liquidity. The reforms to usher in private sector participation in mining, power distribution and privatisation of PSEs will kickstart the investment cycle.
- Japan's GDP contracted by 3.4% in Q1CY20 (QoQ) compared with 7.3% decline in Q4CY19, thus slipping into a technical recession. While Q4 print was marred by disruptions due to typhoons and consumption slump due to tax increase, Q1 print shows the impact of COVID-19. Exports fell the most (21.6%), followed by private residential investment (16.9%) and private consumption (2.8%).
- Germany's GDP contracted by 2.2% in Q1CY20 (QoQ) versus 0.1% decline in Q4CY19. Current print is the lowest since Q1CY09 and was led by sharp reduction in household consumption, GFCF in machinery and equipment and exports. On the other hand, GFCE contributed positively to growth. Government expects a further 10% decline in GDP in Q2.
