

## MACRO DAILY

18 November 2020

### Macro developments

- RBI's data showed that state borrowings in FYTD21 are up by 49% compared with last year and stood at Rs 4.48tn as of 17 Nov 2020. Cost of borrowing remains a concern for states as the average gap between SDLs and G-sec is beginning to inch up again. While it was at 54bps in the last auction it rose to 61bps in the recent auction held on 17 Nov 2020. However, RBI's OMO has supported the average gap which went down to 53.8bps in Nov'20 from 61.1 in Oct'20.
- US retail sales rose at the slowest pace in 6-months by 0.3% in Oct'20 (est.: 0.5%) and against 1.6% increase in Nov'20. Excluding auto and gasoline, sales rose by only 0.2%, reflecting muted consumption demand. Industrial production on the other hand rose by 1.1% against 0.4% decline in Sep'20, led by increase in utilities (3.9% against -5.2% in Sep'20).
- RBA in its minutes re-affirmed that lower policy rates will continue as long as needed and are already showing effects. It observed that borrowing costs have fallen, exchange rate is low and there is steady growth in asset prices. In terms of forward guidance, it confirmed that targeting of 3-year bond rate will be continued instead of using 5-year bond rate. Unemployment was also given more weightage in the discussion.
