Macro developments

- Centre's fiscal deficit continues to remain elevated as revenue receipts are in free fall while spending is maintained. Net tax revenues were down by 40.6% in FYTD21 (Apr-Jul) versus 14% increase in FYTD20. This was driven by 33.2% decline in direct taxes and 27% drop in indirect taxes, versus 5.8% and 7.2% increase respectively in FYTD20. Total spending is up by 11.3% (revenue spending at 12.2%, capex at 3.9%).
- RBI has taken measures to improve system liquidity. It has announced special OMOs of another Rs 200bn in Sep'20. It will also conduct term repos of Rs 1tn. Further, banks that had availed funds under LTROs are allowed to refinance their borrowings via these term repo auctions at lower costs. RBI has also allowed banks to hold fresh securities acquired from Sep'20-Mar'20 in the HTM bucket up to 22% of NDTL.
- South Korea's exports contracted for the 6th straight month in Aug'20 by 9.9% (est. 11.5% decline) versus 7.1% in Jul'20. This was attributed to fewer working days even as global demand has picked up. Manufacturing PMI rose to a 6-month high at 48.5 in Aug'20 from 46.9 led by a pickup in new exports orders.
