

MACRO DAILY

22 August 2019

Macro developments

- RBI minutes revealed that MPC has kept room open for further reduction in rates as economic activity continues to decelerate. A benign inflation outlook favours lower real rates. We believe there is room for another 40bps cut in policy rates (110bps in CYTD19). However, focus will be on transmission, particularly, for new loans linked to external benchmark to ensure lower lending rates which will incentivize consumers/ firms to invest.
- RBI reported that currency in circulation increased by Rs 46bn (on a weekly basis) and stood at Rs 21.9tn as on 16 Aug 2019. Overall reserve money increased by 13.6% on a YoY basis vs 19.4% a year ago. On FYTD basis, reserve money has risen by 1% against 1.9% in the previous year.
- US FOMC minutes highlighted that the current 25bps reduction in policy rate was a part of “recalibration of the stance of policy”. The mid-cycle adjustment was guided by muted growth outlook (especially business investment and manufacturing) and ongoing trade tensions. Few of the FOMC members also preferred a 50bps cut at the current juncture when inflation is also softening and global central banks are on a path of easing.
