### Macro developments

- According to news reports, direct tax collections on FYTD basis (till 15 Jan 2020) are down by (-) 5.2% to Rs 7.3tn vs BE of Rs 13.4tn. This trend is unprecedented as collections were up by 12.5%, 18.6% and 14.9% in the same period in FY17, FY18 and FY19 respectively. While the shortfall is largely driven by lower corporate tax collections, income tax receipts are also seeing a slowdown at 6.5% vs BE of 23.3%.
- UNCTAD's report showed global FDI fell to US\$ 1.39tn in CY19 vs US\$ 1.41tn in CY18. This was on account of subdued global growth and concerns over protectionist policies. However, outlook for CY20 would improve with fears eventually waning out. India was among the top 10 recipients of FDI with US\$ 49bn inflows in CY19 vs US\$ 42bn in CY18.
- Germany's ZEW economic sentiment indicator rose sharply in Jan'20 to 26.7 (highest since Jul'15) from 10.7 in Dec'19. The improvement was on the back of settlement of US-China trade dispute and less than expected impact of trade war on CY19 GDP growth. As a result, Germany's current economic condition index also rose to (-) 9.5 from (-) 19.9 in Dec'19.
