Macro developments

- India's exports fell further in Nov'20 by 9.1% versus 5.1% drop in Oct'20. Oil exports fell much sharply by 63.8% (52% decline in Oct'20). India's imports contracted further by 13.3% in Nov'20 compared with a decline of 11.5% in Oct'20. This was led by 43.4% decline in oil imports versus 38.5% dip in Oct'20. However, non-oil-non-gold imports rose in double digits to 10.7% in Nov'20 from 0.9% in Oct'20.
- Employment scenario in both the Euro area and EU improved in Oct'20. In the Euro area, unemployment rate dropped to 8.4% in Oct'20 from 8.5% in Sep'20. While in the EU, it remained stable at 7.6% in Oct'20. This print has come as a respite amidst rising Covid-19 cases in the region and uncertainty over stimulus.
- Services activity in China also gained pace as the Caixin PMI reading rose to 57.8 in Nov'20 (est.: 56.3) against 56.8 in Oct'20. This was led by new business which expanded at its quickest pace since Apr'10, with new export orders expanding for the first time in five months. Business confidence also strengthened for the third month in a row. Input cost pressure and employment picked up.
