Macro developments

- India's manufacturing PMI accelerated for the 3rd straight month to a 13-year high of 58.9 in Oct'20 from 56.8 in Sep'20. This was led by improvement in both new orders and exports orders with robust expansion in intermediate goods sector amidst easing of lockdown restrictions. Companies expect the ongoing momentum to sustain led by upturn in input buying and restocking efforts.
- US ISM manufacturing PMI rose to a 2 years at 59.3 in Oct'20 from 55.4 in Sep'20. This was led by a sharp uptick in new orders to a near 17-year high at 67.9 versus 60.2 in Sep'20. Out of the 18 manufacturing industries, 15 recorded strong growth led by apparel and leather & allied products. The sub-index for employment rose for the first time since Jul'19 to 53.2 from 49.6 in Sep'20.
- Reserve Bank of Australia (RBA) has cut its cash rate to a record low at 0.1% from 0.25% citing high unemployment and risks to growth. RBA also lowered its target for 3Y government bond yield and bank lending facility rate to 0.1%. It also announced purchase of AUD 100bn government bonds of 5-10Y maturities over the next 6 months. The bank expects GDP growth at 6% over the year to Jun'21 and by 4% in CY22. Inflation is estimated at 1% in CY21 and 1.5% in CY22.
