### Macro developments

- As per CMIE data, India's unemployment rate rose to a 4-month high of 7.97% in Apr'21 from 6.5% in Mar'21. Both rural and urban unemployment rate rose considerably to 7.13% (4-month high) and 9.78% (8-month high) respectively, in Apr'21. Lockdown related restrictions have impacted the print. However, the numbers are still lower than the 23.5% unemployment rate seen in Apr'20, at the time of nationwide lockdown.
- US factory orders rose by 1.1% in Mar'21 on a MoM basis (est. 1.3% increase) from a fall of 0.5% in Feb'21. This was led by strong demand for machinery, automotive and fabricated and primary metal products. Orders for non-defence capital goods (ex. aircraft) rose at a faster pace of 1.2% versus an increase of 0.9% in Feb'21. Separately, US trade deficit (goods and services) rose to a record high of US\$ 71.1bn in Feb'21 from US\$ 67.8bn in Jan'21 as exports fell at a faster pace than imports.
- Reserve Bank of Australia kept its key rates (0.1%) unchanged and is likely to continue with this policy for a prolonged period, in order to pull down unemployment and push inflation higher. This comes in the wake of economic recovery from the downturn led by Covid-19. RBA has also revised its growth forecast upwards to 4.75% in CY21 from 3.5% earlier.
