Macro developments

- India's services PMI jumped back into expansion, rising to a 1-year high at 53.8 in Jul'19 from 49.6 in Jun'19. This was led by new orders which rose at the fastest pace in over 3 years, driven largely by foreign demand. This coupled with rising optimism about new business, resulted in higher employment since Mar'11. Composite PMI also rose to an 8-month high at 53.9 in Jul'19 (50.8 in Jun'19).
- Services activity in the Eurozone signalled expansion albeit at a slower pace of 53.2 in Jul'19 vs 53.6 in Jun'19. This was led by modest expansion in new orders and employment. Similar trend was observed for Japan, with services PMI at 51.8 in Jul'19 vs 51.9 in Jun'19. China's Caixin services PMI recorded its lowest level in the past 5-month at 51.6 in Jul'19, led by weaker pace of expansion in new business activity.
- US ISM non-manufacturing index fell to its lowest since Aug'16 at 53.7 in Jul'19 from 55.1 in Jun'19 (est. 55.5) as new orders shrank (54.1 vs 55.8). Slower domestic growth and trade war concerns weighed on businesses. Employment however ticked higher (56.2 vs 55) suggesting that labour market continues to remain strong.
