06 November 2019

### Macro developments

- India's services PMI fell to 49.2 in Oct'19 vs 48.7 in Sep'19. The slower pace of reduction was led by increase in new export orders. However, domestic demand remains muted, with competitive pressures and higher input prices building stress on profit margins. Employment growth too remains subdued. The 12-month outlook fell to its 14-year low in Oct'19.
- US ISM non-manufacturing PMI rose to 54.7 in Oct'19 after falling to a 3-year low at 52.6 in Sep'19. Amongst the sub-indices, employment index rose the most to 53.7 (+3.3) followed by new orders at 55.6 (+1.9). Separate data showed that US trade deficit narrowed to US\$ 52.7bn in Sep'19 vs US\$ 55bn in Aug'19.
- In line with market expectations, central banks of both, Australia (RBA) and Malaysia (BNM), held policy rates unchanged at 0.75% and 3% respectively. RBA and BNM also clarified that future course of policy will be data driven and dependent on US-China trade deal. RBA trimmed its growth forecast for CY19 to 2.25% from 2.5% earlier. Both banks are expected to deliver at least one more rate cut in early CY20.
