ECONOMIST
Aditi Gupta

CPI inflation in US moderated to 0.3% in Apr'24 (est. 0.4%) from 0.4% in Mar'24 (MoM). Core inflation also eased to 0.3% (from 0.4%). Separately, growth in retail sales was flat in Apr'24 (est. 0.4%), following a 0.6% increase in Mar'24 (MoM). The data has led to increased expectations of Fed's rate cut cycle to commence from Sep'24. GDP growth in the Eurozone bounced back to 0.3% in Q1 CY24 after declining by 0.1% in Q4 CY23. Notably, the European Commission left the growth forecast for the region unchanged at 1% in 2024. However, inflation estimate was revised lower to 2.5% in 2024 versus 2.7% estimated earlier. In Japan, GDP growth declined sharply by 0.5% in Q1 CY24 versus an expected 0.3% decline (QoQ), led by a continued contraction in private consumption. In India, trade deficit inched up to a 4-month high in Apr'24 as imports increased at a faster pace than exports.

- Global stocks closed mixed. Stocks in US inched up as moderation in CPI and retail sales reignited hopes of a rate cut by Fed this year itself. Shanghai Comp moderated as US imposed steep tariffs on Chinese imports. Sensex fell by 0.2%, led by auto stocks. However, it is trading higher today, in line with Asian stocks.

- Global currencies appreciated against the dollar. DXY dipped by 0.6% after a US macro data boosted bets of a rate cut in Sep'24. JPY gained the most by 1%. EUR also gained following a stronger than expected growth in Q1 CY24 GDP. INR remained rangebound. It is trading stronger today, in line with its Asian peers.

- Barring Japan and China, global yields closed lower. US 10Y yield fell by 10bps supported by moderation in CPI data. The reverberation was also felt across yields in UK and Germany. In China, traders remained watchful of the impact of long tenor bond sales. India's 10Y yield fell by 3bps led by global cues. It is trading further lower at 7.06% today.
