

WHOLESALE INFLATION

14 October 2019

WPI inflation eases to a 39-month low

WPI inflation eased to 0.3% in Sep'19 from 1.1% in Aug'19 driven by lower fuel and power inflation at (-) 7.1% in Sep'19 (-4% in Aug'19). Even manufactured product inflation fell to (-) 0.4% in Sep'19. On the other hand, food inflation increased marginally to 6% in Sep'19 from 5.8% in Aug'19 led by onions. The macro backdrop fits in with the lower than estimated WPI inflation as producer pricing power is limited. Even CPI inflation will continue to remain below RBI's target of 4% thus opening room for another 25bps rate cut in Dec'19.
