Strong quarter; outlook bright

- Topline jumps 28.7% in Q1, with gross margin rising 140bps and EBITDA margin 180bps
- UCP segment surges 44.3% in Q1; market share steady at 13.75%; management reaffirms 25%-30% revenue growth in FY25
- We raise FY25E/FY26E EPS by 2%/4%, introduce FY27 estimates, and value the stock at 44x P/E. We set a new TP of Rs 1,870. Maintain BUY

Robust quarter: BLSTR's Q1FY25 revenue increased 29% YoY to Rs 28.6bn, in line with our estimates. EBITDA jumped 64% YoY to Rs 2.3bn, surpassing our estimates due to robust performances across all verticals. The unitary cooling product (UCP) and electromechanical project (EMP) segments continued to thrive, fuelling management's optimism for FY25 growth. EBITDA margin expanded by 180bps YoY and 100bps QoQ to 8.3%. APAT surged to Rs 1.68bn, a strong 102% YoY increase. The company's carry-forward order book as of Jun'24 grew ~14%, setting a record at Rs 60.8bn.

UCP segment shines: The UCP division grew a robust 44.3% YoY, driven by a severe nationwide heatwave, achieving a strong EBIT margin of 9.1%. This performance surpassed Lloyd's EBIT margin of 3.3%. BLSTR is rapidly gaining market share and now commands 13.75% of the market, near its FY25 target of 15%. Management is optimistic about reaching this goal by FY25, bolstered by strategic brand building, a broader product portfolio, and enhanced distribution efforts.

EMP business hits new heights: The EMP division delivered a striking topline of Rs 10.3bn with an EBIT margin of 9.9% in Q1, showcasing notable gains sequentially and YoY. This robust margin, up 240bps QoQ and 290bps YoY, marks a new high for the segment. The order book jumped 13% YoY to Rs 45bn, fuelled by a surge in commercial air conditioning systems, underscoring the division's dynamic performance and growth trajectory.

Maintain BUY, raise TP to Rs 1,870: BLSTR's UCP business was robust in Q1 and its EMP business has a robust order backlog along with the benefit of strong industry tailwinds. We raise our FY25/FY26 EPS estimates by 2%/4% on the back of the strong quarterly performance and buoyant outlook for FY25. Also, we introduce our FY27 estimates. Upon rolling forward valuations to Jun'26E, our TP increases to Rs 1,870 (from Rs 1,670), based on an unchanged target P/E of 44x. Our target multiple is at ~20% premium to the stock's five-year average. Maintain BUY.

Earnings call highlights

Electro-Mechanical Products

- Segment performance: In the EMP business, the company reported topline of Rs 10.3bn for Q1, ~10% growth YoY. EBIT margin for Q1 stood at 9.9%. Margin here is expected to hover at 7.5-8% and management believes that 20-35% revenue growth is possible here.
- Order book: The company ended the year with a Rs 45bn order book, growth of 12.9% over Q1FY24, due to growth coming in from commercial air conditioner systems.
- Electromechanical projects and market dynamics: Despite limited traction in the commercial building sector, the electromechanical projects business experienced robust bookings from the factories and data center sectors. This growth was largely driven by ongoing government efforts to encourage manufacturing investments through Production-Linked Incentive (PLI) initiatives. Also, there was a noticeable increase in inquiries from the healthcare and retail sectors. The railway electrification sector saw a consistent inflow of inquiries and tenders, although there was a slowdown in order finalisations in the power and metro railway sectors.
- Commercial Air Conditioning Systems: The demand for commercial air conditioning systems in the government sector remained subdued. However, increased demand from the education, manufacturing, and retail sectors more than compensated by driving revenue growth during the quarter. Price revisions and prudent cost management contributed to improved margins. Strong demand continued in tier-3 and -4 cities, with significant orders primarily driven by ducted systems and VRF (variable refrigerant flow) chillers
- Market position: The company maintained its top position in conventional and inverter ducted air conditioning systems and ranked among the top three players in India in scroll chillers, VRF, and screw chillers. This quarter also saw the expansion of the product range with the commercial launch of state-of-the-art chillers for data centre replication and brine chillers. With these new product lines, the company is confident of penetrating new market segments, especially with high-margin products, leading to a significant improvement in EMP's margin in Q1FY25 compared to Q1FY24.
- International business: Demand in the Middle East and Africa remained subdued during the quarter. Despite this, the company is strategically focusing its international business efforts to address market needs accordingly. Investments in R&D are ongoing to expand the product portfolio and enhance offerings. BLSTR's subsidiaries in the US and Europe are actively engaging with customers, and management expects business activity in these regions to pick up traction soon.

Unitary Cooling Products

 Segment performance: The UCP segment grew 44.3% YoY with topline of Rs 17.2bn during Q1.

- Cooling and Purification Products: The cooling and purification products business experienced exceptionally strong growth this quarter, particularly for room air conditioners (RACs), driven by seasonal demand and unusually high temperatures. The demand exceeded inventory plans, but the company successfully capitalised on this by ramping up production. Despite a 50% increase in production, some market demand in May was unmet. Margins for the quarter improved due to volume growth, which enhanced operating leverage. The performance in Q1FY25 was exceptional, and the company remains optimistic about growth prospects for the entire year.
- RAC market: The RAC market grew 65-75% in Q1FY25, which is expected to be the peak of this summer season. Management expects the RAC industry to grow by 20-25% annually, and expects BLSTR to grow at 25-30%.
- **Market share:** The company estimates its market share to remain at 13.75%, which is flat QoQ.
- Commercial refrigeration business: The commercial refrigeration market, including deep freezers, water coolers, and modular cold rooms, continued to grow at a CAGR of 15%. However, regulatory changes for water coolers announced in the last week of Mar'24 impacted sales in Q1FY25. Although production and sales normalised in Q2FY25, the substantial reduction in water cooler sales resulted in lower-than-expected revenue growth and profitability for Q1FY25. Despite this, the company maintains its leadership in key categories such as deep freezer storage, water coolers, and modular cold rooms.
- Market outlook and growth prospects: The outlook for the commercial refrigeration market remains strong, and the company expects to accelerate its growth in the coming quarters. Continued investments in research and development and strategic focus on meeting market demands are expected to drive sustained growth. The company's leadership in key product categories and ability to adapt to regulatory changes position it well for future expansion and profitability.
- Profitability: EBIT margin for Q1 stood at 9.1% which is 160bps expansion vs Q1FY24.

Professional Electronics and Industrial Systems

- Segment performance: The PEIS business showed healthy performance as well, with revenue growth at ~24% in Q1. Q1FY25 EBIT margin was 350bps lower at 9.9%. While most product categories performed well, supply chain disruptions and cost overruns in the MedTech business impacted segment margins.
- Positive business outlook and robust order books: Despite challenges, the year started on a positive note with robust demand for BLSTR's product portfolio. The outlook for the remainder of the year remains favourable, with expectations of sustained growth driven by ongoing market trends and the launch of new products. The company is pleased to announce that its order books remain robust, reflecting the sustained confidence and trust placed in them by esteemed customers and partners. This strong order book is indicative of continued growth and a positive trajectory for the business.

Other highlights

- Capex: The company's capex plan for the current year is around Rs 4.5bn. Over the next two to three years, this expenditure could range between Rs 7.5bn and Rs 8bn. This aligns with the previously indicated capex plan, and the company remains committed to it. Any new developments will be assessed as they arise.
- QIP funds utilisation: The funds raised through the Qualified Institutional Placement (QIP) in September last year were allocated for specific purposes, including cab manufacturing, R&D, digitalisation, and growing working capital needs. These funds were utilised as planned, supporting the company's strategic initiatives and operational requirements.
- Liquidity profile: The net cash balance stood at Rs 10bn, compared to net borrowing of Rs 2bn in Q1FY24.
- Profitability: Gross and EBITDA margins expanded during the quarter and the year ended Mar'24, largely due to better raw material pricing. Adjusted PAT grew 2x to Rs 1.5bn in Q1.

Valuation methodology

BLSTR's UCP business demonstrated exceptional strength in Q1, while its EMP segment benefitted from a robust order backlog and favourable industry tailwinds. In response to this strong quarterly performance and promising outlook for FY25, we have raised our FY25/FY26 EPS estimates by 2% and 4%, respectively. Also, we introduce FY27 estimates. As we roll forward our valuations to Jun'26, our TP rises to Rs 1,870 (from Rs 1,670), maintaining a P/E ratio of 44x. This new TP reflects ~20% premium over the stock's five-year average. We continue to maintain our BUY recommendation.

Key risks

Key downside risks to our estimates are:

- inability to expand UCP market share amid rising industry competition, and
- weakness in the EMP order book.

BOBCAPS has not been debarred from doing business by any stock exchange or SEBI or any other authority. No disciplinary action has been taken by any regulatory authority against BOBCAPS affecting its equity research analysis activities.

BOBCAPS is also a SEBI-registered intermediary for the broking business having SEBI Single Registration Certificate No.: INZ000159332 dated 20 November 2017.

BOBCAPS prohibits its analysts, persons reporting to analysts, and members of their households from maintaining a financial interest in the securities or derivatives of any companies that the analysts cover. Additionally, BOBCAPS prohibits its analysts and persons reporting to analysts from serving as an officer, director, or advisory board member of any companies that the analysts cover.

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients that reflect opinions contrary to the opinions expressed herein, and our proprietary trading and investing businesses may make investment decisions that are inconsistent with the recommendations expressed herein. In reviewing these materials, you should be aware that any or all of the foregoing, among other things, may give rise to real or potential conflicts of interest. Additionally, other important information regarding our relationships with the company or companies that are the subject of this material is provided herein.

This material should not be construed as an offer to sell or the solicitation of an offer to buy any security in any jurisdiction. We are not soliciting any action based on this material. It is for the general information of BOBCAPS's clients. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Before acting on any advice or recommendation in this material, clients should consider whether it is suitable for their particular circumstances and, if necessary, seek professional advice. BOBCAPS research reports follow rules laid down by Securities and Exchange Board of India and individuals employed as research analysts are separate from other employees who are performing sales trading, dealing, corporate finance advisory or any other activity that may affect the independence of its research reports.

The price and value of the investments referred to in this material and the income from them may go down as well as up, and investors may realize losses on any investments. Past performance is not a guide for future performance, future returns are not guaranteed and a loss of original capital may occur. BOBCAPS does not provide tax advice to its clients, and all investors are strongly advised to consult with their tax advisers regarding any potential investment in certain transactions — including those involving futures, options, and other derivatives as well as non-investment-grade securities — that give rise to substantial risk and are not suitable for all investors. The material is based on information that we consider reliable, but we do not represent that it is accurate or complete, and it should not be relied on as such. Opinions expressed are our current opinions as of the date appearing on this material only. We endeavour to update on a reasonable basis the information discussed in this material, but regulatory, compliance, or other reasons may prevent us from doing so.

We and our affiliates, officers, directors, and employees, including persons involved in the preparation or issuance of this material, may from time to time have "long" or "short" positions in, act as principal in, and buy or sell the securities or derivatives thereof of companies mentioned herein and may from time to time add to or dispose of any such securities (or investment). We and our affiliates may assume an underwriting commitment in the securities of companies discussed in this document (or in related investments), may sell them to or buy them from customers on a principal basis, and may also perform or seek to perform investment banking or advisory services for or relating to these companies and may also be represented in the supervisory board or any other committee of these companies.

For the purpose of calculating whether BOBCAPS and its affiliates hold, beneficially own, or control, including the right to vote for directors, one per cent or more of the equity shares of the subject company, the holdings of the issuer of the research report is also included.

BOBCAPS and its non-US affiliates may, to the extent permissible under applicable laws, have acted on or used this research to the extent that it relates to non-US issuers, prior to or immediately following its publication. Foreign currency denominated securities are subject to fluctuations in exchange rates that could have an adverse effect on the value or price of or income derived from the investment. In addition, investors in securities such as ADRs, the value of which are influenced by foreign currencies, effectively assume currency risk. In addition, options involve risks and are not suitable for all investors. Please ensure that you have read and understood the Risk disclosure document before entering into any derivative transactions.
