SUMMARY

INDIA ECONOMICS: MONTHLY ECONOMIC BUFFET

Continued slowdown in global manufacturing activity in Jun'23 (at 6-month low of 48.8) and drop business optimism index to 7-month low, has reignited fears of global growth slowdown. Activity in China is losing momentum (PMIs, industrial production, retail sales), which is impacting Europe the most. In case of US, there are mixed signals. While manufacturing activity and consumer spending is getting impacted, real estate sector is seeing some revival and labour market still remains relatively tight. More cues on Fed's future rate action are awaited from the release of Fed minutes later this week.

MONTHLY ECONOMIC BUFFET

04 July 2023

Economic Round-up: June 2023

Continued slowdown in global manufacturing activity in Jun'23 (at 6-month low of 48.8) and drop business optimism index to 7-month low, has reignited fears of global growth slowdown. Activity in China is losing momentum (PMIs, industrial production, retail sales), which is impacting Europe the most. In case of US, there are mixed signals. While manufacturing activity and consumer spending is getting impacted, real estate sector is seeing some revival and labour market still remains relatively tight. On the domestic front, after a delayed start, South-West monsoon has picked up pace and registered below normal rainfall at only 13% (below LPA) till 29 Jun 2023. This has resulted in overall improvement in sown area (+0.4% YoY as of 30th Jun). RBI in its Jun'23 policy kept the rates on hold as inflation has begun to come down. Our in-house BoB ECI index is showing that CPI will settle between 4-4.3% in Jun'23. We expect RBI to cut rates only in Q4FY24.

Global growth: Growth engines across regions seem to be losing steam with manufacturing activity faltering. Significant decline is noted in Europe and US. In case of Europe, both UK and Germany are facing headwinds as elevated prices are denting consumer demand and slowdown in China is hurting export of goods. Germany's Ifo business sentiment signals that GDP might contract in Q2. In China, following partial recovery made at the beginning of the year (supported by pent up demand and Lunar New Year celebrations), now weakness in activity has returned. While manufacturing activity is contracting (official PMI), non-manufacturing PMI has come down in Jun'23. More government is widely expected to stimulate growth.

Global Central Banks: In view of stickiness in inflation in UK, BoE is expected to hike rates at least 2 more times after delivering a surprise 50bps hike in Jun'23. ECB officials have also maintained that underlying inflationary trends are showing that the Central Bank will have to keep hiking rates this year and cuts can only begin in late CY24. US Fed paused in Jun'23 for the first time in 15-months, but signalled that this is not the end of the rate hike cycle. Fed Chair Powell has hinted at 2 more rate hikes this year, however, in view of recent economic print market participants are expecting Fed to pause after hiking for the final time in Jul'23.

Key macro data releases: India's current account deficit (CAD) increased to US\$ 67.1bn in FY23 from US\$ 38.7bn in FY22. This translates into a CAD of -2% of GDP in FY23 versus -1.2% of GDP in FY22. Trade deficit increased to a record high of US\$ 265.3bn in FY23 (7.8% of GDP) from US\$ 189.5bn in FY22 (6% of GDP).

On the Fiscal front, Centre's fiscal position in FYTD24 (Apr-May'23) seems be on track with its net revenue rising by 15.7%, following (-) 13.9% decline in Apr'23. Pace of contraction in direct tax collections has slowed, while that of indirect tax collections has improved.
