CANARA BANK | TARGET: Rs 140 | +18% | BUY

Consistent recovery in business performance

SUMMARY

CANARA BANK

- Stable business growth coupled with change in credit mix likely to aid margin. CBK targets NIM of 2.9-3.0% and opex of 47% over FY25
- Controlled slippages and higher recovery and upgrades led to asset quality improvement. Target credit cost of below 100bps to aid PAT
- With consistent improvement in business performance, we assume coverage with TP of Rs 140 set at 1.2x FY26 ABV and maintain BUY

Consistent recovery in business performance: CBK witnessed stable business growth and consistent recovery in its bottomline, supported by improved margins and asset quality. This has helped the company regain its appeal over the past year. In its latest result in Q4, the bank clocked NII growth of 11.2% YoY (2% QoQ) with a 4bps improvement in NIM, while posting credit growth of 12% and deposit growth of 11% leading to a CD ratio of 71%. CBK guided for conservative business growth of 9-10% for FY25, while it aims to maintain NIM at 2.9-3.0% supported by changes in portfolio mix from AAA-rated low-yielding corporate book to retail lending. Credit/ deposits grew 12%/11% YoY in Q4, backed by healthy growth in RAM (retail, Agriculture and MSME; 13.5% YoY) while CBK guided for 10-11% YoY growth for FY25 skewed towards retail.

Other income supports PPOP growth: Considering CBK's focus on deposit mobilisation and business granularity, we model for credit/deposit CAGR of 12.5%/11.6% over FY24-26 with a stable margin of 2.7% (calc.). Other income rose 21% QoQ in Q4, driven by treasury gains (Rs 6.6bn) and consistent recovery in written-off A/Cs (Rs 19bn), which the bank expects to be recurring in nature and guided to be Rs 40bn-50bn in FY25-FY26. CoI remained elevated due to higher wage revision (maintained guidance at 47%) leading to muted POP growth (9% YoY). Higher provision dragged PAT (18% YoY) to Rs 37.6bn in Q4.

Upgrades and recovery led to asset quality improvement: Controlled slippages with higher upgrades and recovery led to consistent improvement in asset quality, wherein GNPA/NNPA improved 112bps/46bps YoY in FY24 to 4.2%/1.3% with PCR of 71%. Bank credit cost stood at 1.1% and CBK guided it would be below 1%, aiding bottomline. Restructured book at 1.3% and SMA book at 76bps seem higher than for its peers but management is confident of improving its overall asset quality.

Maintain BUY: Considering overall recovery in business performance and stable growth and margin, we model for PAT CAGR of 9% over FY24-26 with ROA and RoE approaching 1%/16% by FY26E. We value the bank at 1.2x FY26E ABV using the Gordon Growth Model and assume coverage with a TP of 140.
