Supported by higher than normal rainfall, there has been continued improvement in the sown area (+1.9% YoY), with higher acreage of pulses, paddy, oilseeds, sugarcane and coarse cereals. Latest data shows, that when compared with normal area of last year, this year ~97% of sowing has been completed so far. As sowing and monsoon inches closer to the end, the focus will now shift towards the harvest season. Excess/large of rainfall can be damaging for crops.

Where does Kharif sowing stand?

As of 27 Aug 2024, overall sown area has improved by 1.9% compared with last year.

- Barring Jute and cotton, total sown area of other crops continues to increase. Most notable jump is visible in pulses (5.7%), coarse cereals (4.5%) and paddy (4.3%).
- Within pulses, rise in acreage of Arhar (12.4%), Moong bean (11.4%) and other pulses (2.9%), led to rise in the headline number.
- In contrast, Kulthi, Urdbean and Moth continue to record a decline.
- Within Coarse Cereals, sown area of only Bajra fell (-1.6%), while that of crops such as Maize, Jowar, Ragi and small millets inched up.
- Oilseeds have also registered 0.5% increase in sown area. Within this, sown area of Soybean, Groundnut and Sunflower inched up, while that of Sesamum, Niger, and Castor declined.
- Amongst other major sub-heads, sown area of Sugarcane (1%) also rose.
- Sown area of Jute & Mesta was down by (-) 13.1% and that of Cotton fell by (-) 9.2% compared with last year.

Solid TSR track record: Attended the investor day of HCL Technologies (HCLT) yesterday. HCLT has delivered industry leading TSR (total shareholder returns) in the last 10 years and aspires to deliver a similar performance in the future too.

No change in near term guidance: HCLT did not update its FY25 guidance of 3-5% CC YoY revenue growth and 18-19% margin. In the near term it stated that there is a modest improvement in demand in pockets like BFSI but at the same time indicated that there are ramp downs from some customers too. Pretty much what we heard in 1QFY25 industry commentary

Talks of a growth acceleration in the next 5 years: Stated that industry is seeing a significant inflection point – expects a double-digit revenue growth potential in USD terms over the next 5 years compared to the ~9.5% CC growth seen in FY19-FY24. HCLT believe the opportunity is large enough and that market participation must go up and the service models must be creative

Better market participation needed: Believes that currently it is addressing the needs of a third of global 2000 customers. And that in another third of this client set, it believes it is participating opportunistically. HCLT believes that it does not address the last third of the G2000 market at all. There is an opportunity in addressing better the latter two customer cohorts. Believes that there is a big opportunity in catering to the needs of the emerging Global 3000 companies. Believes the 'public sector' is not a well tapped opportunity.

Gen AI value compression headwind offset by legacy modernization

opportunity: HCLT is proactively offering clients the efficiency gains that it gets from Gen AI initiatives in return for a larger scope of work. The latter would come from other vendors or internal work being outsourced. It stated that not all vendors are proactively trying to give back efficiencies to their customers. While HCLT stated that passing back of productivity gains to customers will be a headwind to revenue growth it seems greater volume of business from legacy modernization which was hitherto not attempted by customers as they felt that it was a risky proposition.
