SUMMARY
INDIA ECONOMICS: GDP

NSO has estimated that Indian economy is expected to clock a growth of 7.3% in FY24 growth from 7.2% in FY23. GVA growth is estimated lower at 6.9% (previously 7%). Manufacturing paints a bright picture registering much higher growth at 6.5% in FY24. Construction and mining sector too are expected to grow at much faster pace than was anticipated showcasing solid growth for the industrial sector. Even as global headwinds remain strong signaling weakness in global economy, India remains an 'outperformer' amongst its global counterparts led by strong fundamentals. The attention will now shift towards interim Union Budget and corporate performance for Q3 and Q4.

INDIA ECONOMICS: BOB ESSENTIAL COMMODITIES INDEX

BoB Essential Commodity Index (BoB ECI) has fallen by 0.4% in Dec'23, on a sequential basis. This is the first drop since Sep'23. Correction in vegetable prices, seasonal drop in prices and arrival of fresh crops in the harvest month; have all contributed to a favourable outlook for inflation. The drop in prices has been broad based with items such as pulses, edible oil, tea and sugar, all showing moderation. The YoY number is bit charred by unfavourable base. We expect headline CPI to settle at ~5.5% in Dec'23 (adverse base of ~20bps). In the coming months (Jan and Feb), the drop in inflation is likely to be more pronounced, as is already visible in major high frequency price data of Jan'24.

FY24 growth estimated to surge to 7.3%

NSO has estimated that Indian economy is expected to clock a growth of 7.3% in FY24 growth from 7.2% in FY23. GVA growth is estimated lower at 6.9% (previously 7%). Manufacturing paints a bright picture registering much higher growth at 6.5% in FY24. Construction and mining sector too are expected to grow at much faster pace than was anticipated showcasing solid growth for the industrial sector. Even as global headwinds remain strong signaling weakness in global economy, India remains an 'outperformer' amongst its global counterparts led by strong fundamentals. The attention will now shift towards interim Union Budget and corporate performance for Q3 and Q4.

Jahnvi Prabhakar
Economist**1st Advance Estimate of FY24 GDP**

GDP growth for FY24 has been estimated at 7.3% against an increase of 7.2% in FY23 on a YoY basis. This acceleration is led by higher growth in government expenditure which is expected to be grow by 4.1% against a growth of 0.1% back in FY23. Moreover investment demand has seen some moderation, but is still expected to clock double digit growth of 10.3% (11.4% in FY23). However, the dip will be visible in private consumption which is expected to drop down to 4.4% in FY24 (from 7.5% in FY23) which is a concern. Growth in both exports and imports also likely to take a back seat due to weakness in global economy with growth softening to 1.4% (previously 13.6% in FY23) and 13.2% (earlier 17.1%) respectively in FY24.

GVA to be dragged down

GVA growth is expected to moderate a bit to 6.9% in FY24 compared with a growth of 7% in FY23. This was higher than our expectation of 6.7%. Manufacturing and mining sector have registered a robust growth of 6.5% (1.3% in FY23) and 8.1% (4.6% in FY23) respectively in FY24, the same has been reflected by industrial production. Construction sector is expected to clock double digit growth of 10.7% from 10% growth registered in FY23. Within services, financial services is expected to record a healthy growth of 8.9% in FY24 (7.1% in FY23). On the other hand, some moderation is expected in trade, transport and hotel (6.3% vs 14.0%) signalling sluggish demand from the tourism and hospitality industry. Even Agriculture sector has been a disappointment with growth down to 1.8% in FY24 (4% in FY23) on the back of uneven rainfall which resulted in lower kharif estimates. There are further concerns emanating from Rabi sowing. Electricity sector is also pegged to record lower growth of 8.3% in FY24 compared with 9% in FY23.

BOB ESSENTIAL COMMODITIES INDEX

05 January 2024

How prices look in Dec'23

BoB Essential Commodity Index (BoB ECI) has fallen by 0.4% in Dec'23, on a sequential basis. This is the first drop since Sep'23. Correction in vegetable prices, seasonal drop in prices and arrival of fresh crops in the harvest month; have all contributed to a favourable outlook for inflation. The drop in prices has been broad based with items such as pulses, edible oil, tea and sugar, all showing moderation. The YoY number is bit charred by unfavourable base. We expect headline CPI to settle at ~5.5% in Dec'23 (adverse base of ~20bps). In the coming months (Jan and Feb), the drop in inflation is likely to be more pronounced, as is already visible in major high frequency price data of Jan'24.

Dipanwita Mazumdar
Economist

To get an idea about the calculation of the index, refer to our [previous edition](#) of BoB ECI.

Price picture using BoB Essential Commodity Index:

- On MoM basis, BoB ECI fell by 0.4% in Dec'23 from 1.8% increase seen in Nov'23. This is the first decline in the index since Sep'23. 16 out of 20 commodities that is captured in the index have registered a decline in Dec'23 compared to Nov'23. Among them, sharpest correction was visible in case of vegetable prices. Onion prices have fallen by 14.8% in Dec'23 from 56.2% increase in Nov'23, on MoM basis. Even tomato and potato prices have fallen by 4.8% and 4.4%, respectively. Other commodities where prices have inched down are all items of pulses (Gram, Tur, Urad, Moong, Masur), edible oil, tea, sugar and milk. However, on a seasonally adjusted basis, it has risen slightly by 0.9% in Nov'23.
- On YoY basis, BoB ECI registered growth rate of 4.2% in Dec'23. 7 out of 20 commodities have registered softening of prices. Notable ones include edible oil, potato, Masur and Wheat (Atta). Unfavourable base affected prices of other vegetables such as Tomato and Onion.
- For the first 4 days of Jan-24, BoB ECI has fallen by 1% on MoM basis and even on a YoY basis it has moderated to 3.9%. Sequential correction was visible in the prices of rice, wheat, pulses and most importantly for major vegetables (Onion, tomato and potato).

So where is CPI print headed?

- Based on the price dynamics, we expect CPI to settle at ~5.5% in Dec'23. This month witnessed major correction in vegetable prices. Also this coincides with harvest month. Thus, further downtrend may not be overruled. This coupled with seasonality in prices of major food crops, improved Rabi sowing and stable energy prices provide comfort to inflation.
