**CNG volume revival could be delayed:** The slump in CNG volumes was along expected lines as the lockdown in Delhi continued well into June. Some volume revival is expected from Q2FY21 as Delhi has now opened up relatively more than other metros. Management intends to continue with its CNG expansion plans and is looking to add ~70 stations in FY21 and more than 100 in FY22. We estimate that expansion could fuel a surge in volume growth to 28% YoY in FY22 on a low base in FY21. IGL expects CNG volume growth to revive earlier, from Q3FY21 (after a likely 25% YoY decline in H1FY21).

**Margin expansion looks sustainable:** Q1 EBITDA margins were in line with estimates at Rs 3.4/scm (-46% YoY), but still trend well below that of CGD peer Mahanagar Gas (Rs 7.9/scm in Q1). Continued low spot LNG prices and another potential cut in domestic gas prices from Oct'20 could help IGL revive margins. We maintain our long-term margin estimates at Rs 7/scm considering that management aims to recoup the earnings eroded by lower volumes.

**Valuations still demanding:** At 16.7x FY22E EPS, valuations look demanding given near-term volume concerns. Uncertainty surrounding CNG volume ramp-up mars the earnings growth outlook. It could take much longer than earlier anticipated for IGL to reach pre-Covid volume levels.
